- GoodData Enterprise Support
- GoodData Service Level Commitment
- option to purchase implementation or other Ancillary Services
- option to purchase the following Add-Ons:
 - Whitelabeling
 - Lifecycle Management
 - ADS package, additional ADS storage, ADS Export
 - Automated Provisioning
 - Workspace Restore Service
 - GoodSuccess
 - Data Centre Selection
 - Enterprise Shield and related HIPAA/GDPR-S packages
 - Machine Learning capabilities

Product Features / Add-Ons

Analytics Platform

GoodData's Analytics Platform provides tools, runtimes, and storage for data ingestion, preparation, transformation, analytic queries, data visualization, and application integration. All platform capabilities are subject to the conditions and restrictions in the applicable Documentation and Platform Limits.

Agile Data Warehousing Services (ADS)

Agile Data Warehousing Services ("**ADS**") is a Customer Data staging instance. The data size in ADS is measured by the total uncompressed data stored in ADS (rounded up to the whole TB) as if such uncompressed data had been exported from the database in text format ("**ADS Data Size**"). GoodData includes all logical database entities (tables) and all derived and aggregate tables in the measurement of ADS Data Size. ADS may only be used with the GoodData platform in accordance with the GoodData Documentation and cannot be integrated with any unauthorized third-party applications.

ADS Package

ADS package includes ADS with:

- 1TB of ADS storage in production environment ("**PROD**");
- 50GBs of ADS storage in development environment ("**DEV**"); and
- 50GBs of ADS storage in testing environment ("**TEST**").

Additional ADS Storage

Additional ADS storage for Your ADS Data Size over the capacity specified above is available in 1TB increments, is counted separately in each environment (DEV/TEST/PROD), and cannot be shared between different customer domains.

ADS Export

Allows You or Your Users to export up to 100GB of Customer Data from the ADS per one month. Any unused portion of the 100GB export allowance expires at the end of the respective month and is not carried over to the next month.

Automated Provisioning

Enables automated provisioning of Workspaces, users, and permissions. The Automated Provisioning Add-On allows provisioning up to 100 Workspaces in Your GoodData Platform Subscription.

Data Centre Selection

Allows You to choose from the available data center locations where Your Customer Data will be stored. However, such Customer Data may be accessible to GoodData personnel located globally.

Enterprise Shield

Managed Enterprise Shield and **Self-Service Enterprise Shield** are Add-Ons for GoodData customers who want to analyze Sensitive Personal Data in the Subscription Services, or who otherwise want GoodData to assist with their Data Product's security and compliance-related matters. These Add-Ons provide customers with additional auditing capability and access to GoodData's Protocol for managing Sensitive Personal Data, with varying levels of assistance with implementing the Protocol depending on the Add-On purchased as follows:

- **Managed Enterprise Shield.** Under this Add-On, the GoodData Professional Services team manages the initial development of the Data Product via an implementation package , and the GoodData Customer Success team handles daily maintenance and ad-hoc updates under a "Success Advisory Package". You do not directly administer Your Data Product. For any new development or major changes, You will need to purchase additional Professional Services hours. During the applicable Subscription Services Term, GoodData remains fully responsible for the Data Product's Compliance with the Protocol subject to Your compliance with the relevant Managed Enterprise Shield terms and conditions.
- **Self-Service Enterprise Shield.** You can switch from the Managed Enterprise Shield Add-On as described above to the Self-Service Enterprise Shield Add-On once the Data Product Goes Live. You can also start with the Self-Service Enterprise Shield Add-On if You choose to develop Your Data Product independently. In either case, once the Data Product Goes Live, You will manage daily maintenance and ad-hoc updates, submit Your Data Product for periodic Protocol reviews as described below, and will otherwise become fully responsible for the Data Product's Compliance with the Protocol. The Enterprise Shield Add-On is applicable per one Data Product, covers up to 1000 Workspaces, and can be purchased repeatedly.

The Enterprise Shield Add-Ons come with the following restrictions and limitations:

- Self-Service Enterprise Shield customers with ADS may only use Automated Data Distribution for loading Customer Data from ADS to Workspace
- No customer code: Self-Service customers may not use CloudConnect executors (legacy technology) and may only use Ruby bricks developed by GoodData. If GoodData develops a custom Ruby brick for You, GoodData will continue maintaining the brick as instructed by You and subject to maintenance fees.
- During the transition period from Managed to Self-Service Enterprise Shield or initial implementation of Self-Service Enterprise Shield by the GoodData Professional Services team, You may have access to an administrative account solely for the purposes of User and Customer Data provisioning. Prior to the completion of the transition, any modifications to Your solution and/or Your Customer Data flow by You are strictly prohibited and GoodData disclaims any and all warranties or liability to You if You make any such prohibited modifications.

GDPR-S Add-On

The GDPR-S Add-On, which may only be purchased if You have the Enterprise Shield Add-On, facilitates secure and compliant processing of Special Categories of Data. The GDPR-S Add-On includes additional security and compliance safeguards on GoodData end for processing Special Categories of Data, and enables You to execute a Data Processing Addendum which includes processing of Special Categories of Data and to upload and analyze Special Categories of Data pursuant to Article 9 of GDPR.

HIPAA Add-On

The HIPAA Add-On, which may only be purchased if You have the Enterprise Shield Add-On, facilitates secure processing of PHI. The HIPAA Add-On includes additional security and compliance safeguards on the GoodData end for processing PHI Personal Data, and enables You to execute a Business Associate Agreement with GoodData and upload and analyze PHI Personal Data.

GoodSuccess

The GoodSuccess Add-On gives You access to information about usage and user adoption, engagement tracking, monitoring and analytics of up to 100 Workspaces.

Lifecycle Management (LCM)

LCM allows You to configure and control multiple Workspaces, including the ability to release and rollout new versions of Your analytics to all Tenants (DEV/TEST/PROD workflow). The LCM Add-On is for up to 100 Workspaces in Your Subscription and includes additional 2 Standard Tiny Workspaces and 1 Standard Basic Workspace for service, master and development.

Machine Learning

Machine learning capabilities can be purchased as a Small, Medium, Large or Extra large package together with professional services engagement as Ancillary Services. Machine Learning is available only with the Enterprise Subscription plan.

Workspace

Workspaces deliver the analytics service to Your Users. Access to and use of Workspaces are on a subscription basis.

Free Workspace

GoodData Free Workspaces are only available with the GoodData Free Plan and are limited to: (a) Workspace Customer Data Size of up to 100MB per one (1) Workspace; (b) daily Workspace Data Upload Rate of four (4) uploads.

Workspace Data Upload Rate

Workspace Data Upload Rate means the daily average of the number of Customer Data uploads into a Workspace measured on a monthly basis.

Workspace Customer Data Size

Workspace Customer Data Size means the total size of uncompressed Customer Data stored in the Workspace database. Each Workspace comes with Workspace Customer Data Size as specified in Your Order.

Technical artifacts like indexes, projections, and caches are not included in the Workspace Customer Data Size.

Additional Workspace Customer Data Size is available in 5GB increments, which may only be distributed amongst more than one Workspace in minimum increments of 1 GB. Additional Workspace Customer Data Size cannot be distributed to Tiny Workspaces, which are limited by 100MB Workspace Customer Data Size.

Workspace Power Tiers

GoodData offers several Workspace Power Tiers for Growth and Enterprise Subscription Plans corresponding to the performance capabilities specified in the Workspace Tiers Table below.

Workspace Types and Tiers Table

--	--

Workspace Power Tier	Compute Units*
Tiny	1
Basic	12
Strong	150
Premium	300
Ultra	1500

*Compute Unit is a designation that represents the amount of compute resources consumed in the course of ETL or report computation tasks, as reported by GoodData internal monitoring.

Whitelabeling

Whitelabeling enables You to remove certain branding elements in the GoodData platform and (optionally) replace them with branding from Your enterprise in one domain. You can also create Your own themes to customize fonts, texts, and additional visual elements. Whitelabeling is requested through the GoodData Support portal.

Workspace Restore Service

The Workspace Restore Service Add-On allows You to restore up to 10 Workspaces from GoodData managed backups, in accordance with GoodData's retention rules, for one domain. The Workspace Restore Service Add-On can be purchased repeatedly. Backups are available from the moment that the Restore Services are purchased.

GoodData Support

GoodData Support services for each Subscription plan is further described in the GoodData Platform Support Policies, available at: <https://www.gooddata.com/support-policy-slc>.

Platform Limits

All GoodData Platform Subscription Services Plans are subject to the applicable technical limits outlined in GoodData's Platform Limits, available at: <https://help.gooddata.com/display/doc/Platform+Limits>. The provisions relating to ADS, Data Transformation, and Workspace Loading are not applicable to the GoodData Platform Free SubscriptionPlan. Where Your usage exceeds Platform Limits, GoodData is not liable for impact on product performance and may limit Your excess usage in accordance with Platform Limits.
